NATIONAL
ASSOCIATION OF
STATE PARK
DIRECTORS

ANNUAL
INFORMATION
EXCHANGE

1985

FOREWORD

For the seventh consecutive year, the National Association of State Park Directors has compiled an Annual Information Exchange that provides information on state park systems throughout the United States. The data for the report was obtained through a questionnaire that was distributed by the National Association of State Park Directors. The questionnaire was completed by all fifty state park agencies that administer parks, recreation areas, historic sites, and related facilities. With few exceptions, the reporting period covered by the questionnaire is July 1, 1983 to June 30, 1984. The Division of State Parks, Indiana Department of Natural Resources was responsible for the preparation of this document. Printing services were provided by the National Park Service, Denver Service Center.

The report does not attempt to identify cause and affect relationships, nor does it provide an analysis of the data. It is a report that provides information in as straightforward a manner as possible covering visitation, expenditures, income, and the status of various state park systems throughout the nation.

It is important to note that state park agencies administer a wide variety of lands. In some states, the park agency has under its control forests, fish and wildlife areas, as well as other related facilities. In other states, only state parks are under the state park system. The questionnaire was sent to each state park director who identified those lands under his or her jurisdiction, thus some states would show fish and wildlife and forest lands, as well as historic sites, while other states would not show them and they would be found under a separate agency of that state's government.

The following table compares totals of four selected segments of the 1985 Annual Information Exchange with totals from the same segments of the 1984 Exchange. The significant increase in new construction and land acquisition is in marked contrast to 1984 statistics which reflected a decrease in both of those categories. However, the 1985 statistic for "New Construction" is still below the 1983 "Cost of New Construction Initiated." The 1985 improvements in acres purchased and construction initiated appear to be further indicators of nationwide economic improvement.
